Linkurious Enterprise
Datasheet

On-premise graph intelligence platform for threats detection and investigation

Why Linkurious Enterprise?

Fighting threats, from fraud, money-laundering, criminal activities and cyber-attacks has become a data-driven job. But scattered information and massive datasets make traditional detection and investigation approaches obsolete. Organizations need a faster, simpler and more effective solution to address those threats.

Linkurious helps government agencies and Global 2000 companies, from the French Ministry of Finances, Zurich Insurance and the New York State Attorney General, find insights hidden in complex connected data thanks to an intuitive graph intelligence platform.

Making your data your best asset against threats

Linkurious Enterprise uses graph technology and data visualization to turn complex datasets into interactive visual networks. The platform connects to your data sources and enables investigators to seamlessly navigate across billions of entities and relationships. The result is a new ability to detect suspicious relationships without juggling with queries or tables.

Advantages

- Faster investigations

- Detect sophisticated threats

- Stay ahead of adversaries

Requirements

- Linux, Mac OS, Windows

- Chrome 23+, Firefox 17+, Internet Explorer 10+

- AllegroGraph, Datastax, JanusGraph, Neo4j, Stardog

"Linkurious Enterprise was the best solution to uncover persons of interest and potential stories in a short timeframe during the Panama Papers investigations."

Mar Cabra, head of the Data and Research Unit, ICIJ

What you get

A seamless view of heterogeneous data

Linkurious Enterprise ships with built-in support for the leading graph and RDF databases, letting you gather your data sources into a unified picture. You get a comprehensive view of your entities, eliminating the blindspots created by silos and traditional tools.

Investigations made easy

The interactive visualization interface of Linkurious Enterprise offers an easy way to investigate complex connected data. Search for specific entities, expand connections to uncover hidden relationships and apply layouts of your choice to untangle complex networks.

Connecting the dots

With advanced graph and pattern analytics capabilities, Linkurious Enterprise detects sophisticated threats across billions of entities and relationships in real time. Set tailored rules to identify patterns of interest and save time by singling out high-priority alerts.
